2026

Crafting the padel court of the future

-
- + 161,458 FT² OF FACILITIES**
 - + 20 YEARS OF EXPERIENCE**
 - + 1,000 COURTS / YEAR**
 - + 75 COUNTRIES**
 - + 100 PROFESSIONAL TOURNAMENTS**

With more than two decades of experience, at Padel Galís we have designed, manufactured, and installed thousands of padel courts all over the world.

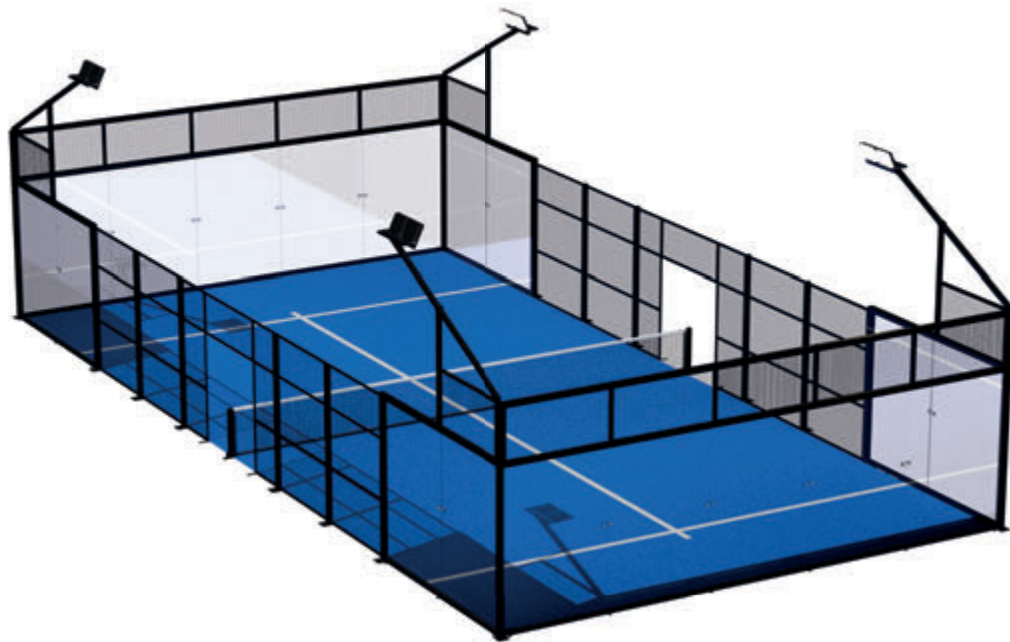

Our experience on the main professional circuits drives us to keep innovating in order to take the game to its highest level. Our goal is clear: to improve the player experience—both professional and amateur—through design, technology, and quality.

OUR COURTS

MUNDIAL 90	03
M360	04
ATLAS	05
SPECIAL EDITION	06
MUNDIAL 160	07
HURACAN	08
WILSON 90	09
WILSON 160	10
WILSON ULTRA	12

MUNDIAL 90

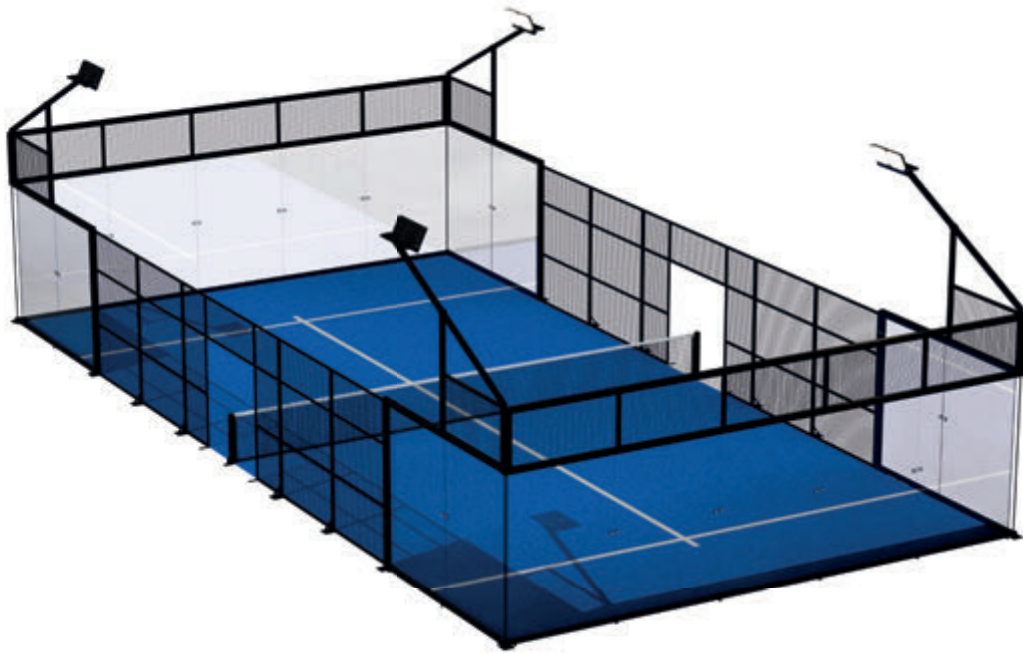

This is the panoramic padel court par excellence. Our classic model stands out for its uniform and simple design, combining straight lines with outstanding strength thanks to its robust corner pillars. Perfect for any type of environment, it is the most versatile court in our range.

Model	MUNDIAL 90
Structure	PANORAMIC
Turf	PGR
Lighting	FILUX
Light pole	GALIS
Accessories	
Wind resistance	56MP/H

M360

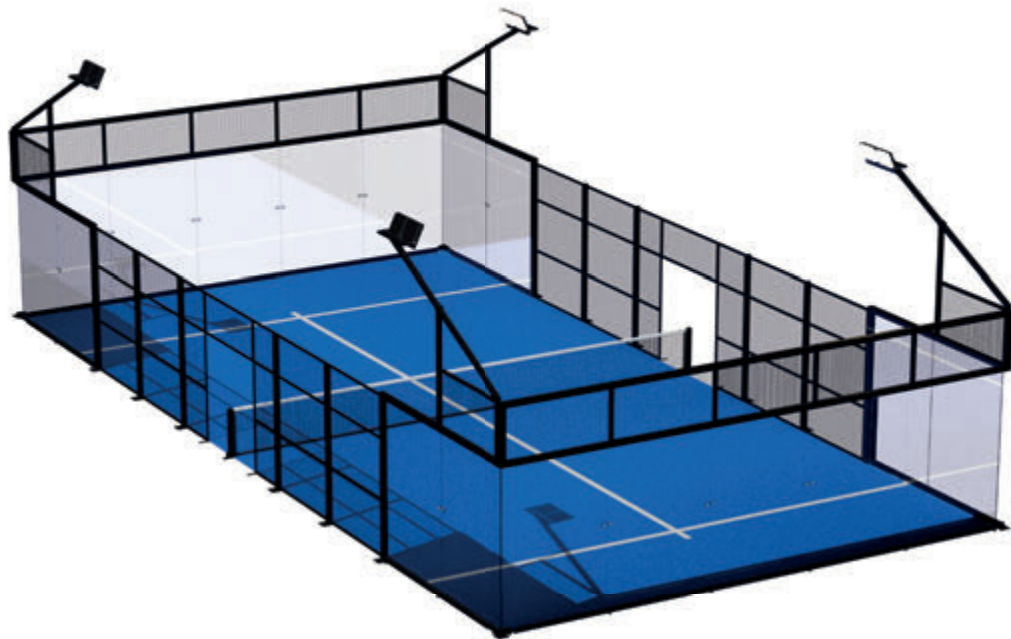

This model is an evolution of our Mundial model and stands out for its slim, rounded corner pillar. Its structure achieves an exceptional balance between strength and elegance, with the aim of expanding on-court visibility.

Model	M360
Structure	PANORAMIC
Turf	PGR
Lighting	FILUX
Light pole	GALIS
Accessories	
Wind resistance	56MP/H

ATLAS

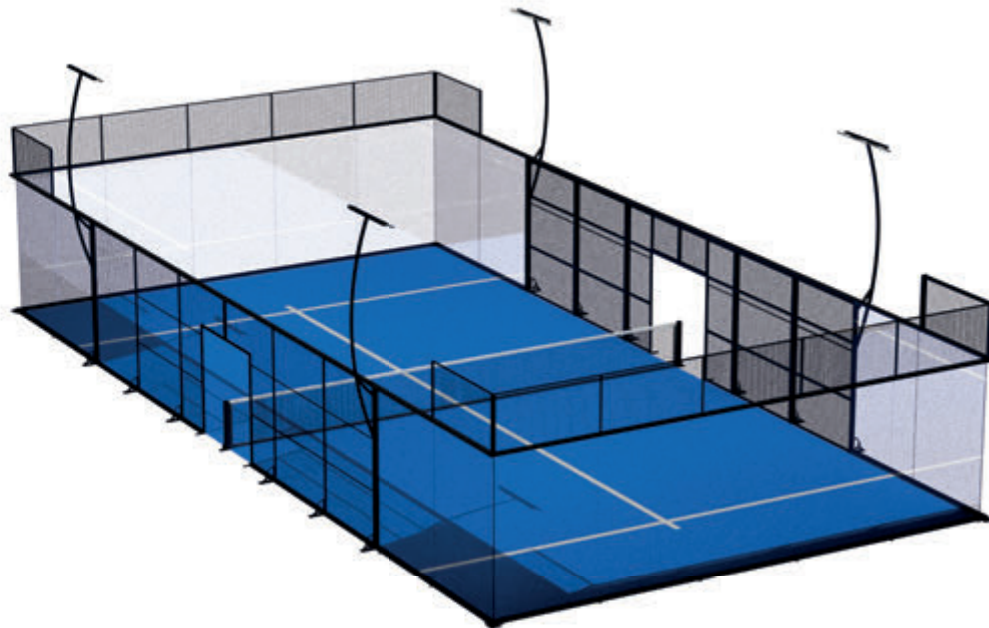

Atlas is an evolution of our iconic Mundial panoramic court. With no corner pillars, its design offers greater visibility and a clean aesthetic. Designed to transform the playing experience and adapt to any environment, combining elegance and functionality.

Model	ATLAS
Structure	ULTRAPANORAMIC
Turf	PGR
Lighting	FILUX
Light pole	GALIS
Accessories	
Wind resistance	42MP/H

SPECIAL EDITION

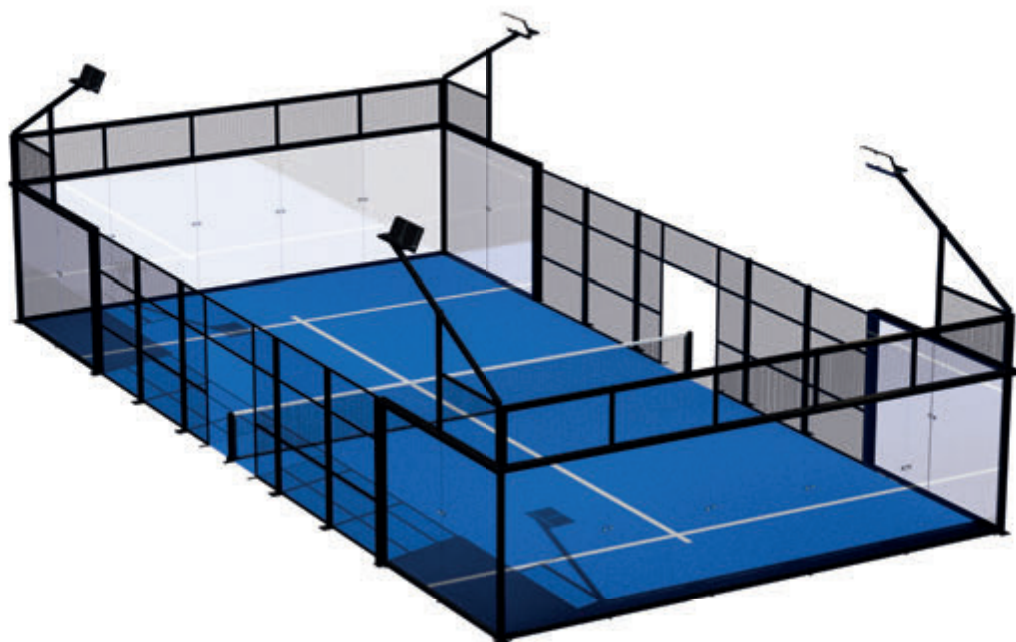

A minimalist court model distinguished mainly by the absence of corner pillars. This unique feature maximizes game visibility for spectators from different angles without any visual obstacles. Its fully panoramic glass design provides a sense of openness and connection with the surroundings.

Model	SPECIAL EDITION
Structure	ULTRAPANORAMIC
Turf	PGR
Lighting	LED PROJECT
Light pole	CURVED
Accessories	
Wind resistance	37MP/H

MUNDIAL 160

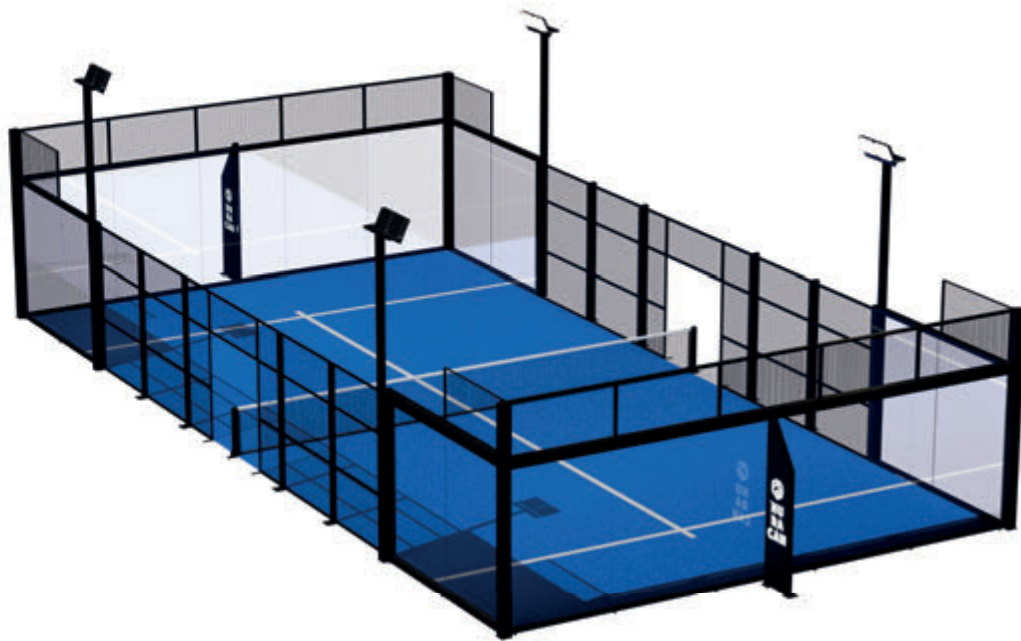

The Mundial 160 is the ultimate panoramic court, designed to withstand winds of up to 115 mp/h without compromising stability or safety. Its reinforced structure, with robust corner pillars, guarantees exceptional strength while maintaining a uniform and elegant design. Perfect for any environment, it combines durability and aesthetics to deliver an unmatched playing experience with maximum visibility.

Model	MUNDIAL 160
Structure	PANORAMIC
Turf	PGR
Lighting	FILUX
Light pole	GALIS
Accessories	
Wind resistance	115MP/H

HURACAN

This court is designed to meet the most challenging weather conditions and withstand the strongest wind gusts. Its solid structure is characterized by a robust pillar at the back of the court, allowing it to resist winds of up to 162 mp/h.

Model	HURACAN
Structure	PANORAMIC
Turf	PGR
Lighting	FILUX
Light pole	STRAIGHT
Accessories	
Wind resistance	162MP/H

WILSON 90

The WILSON 90 court emerges from the union of two companies passionate about driving padel worldwide. Its corner pillars provide great strength while also enhancing visibility. Its design features multiple Wilson customizations, glossy paint finishes, and premium lighting with 4x64 LEDs.

Model	WILSON 90
Structure	PANORAMIC
Turf	PGR
Lighting	4x64 LED
Light pole	V SHAPE
Accessories	Wilson
Wind resistance	56MP/H

WILSON 160

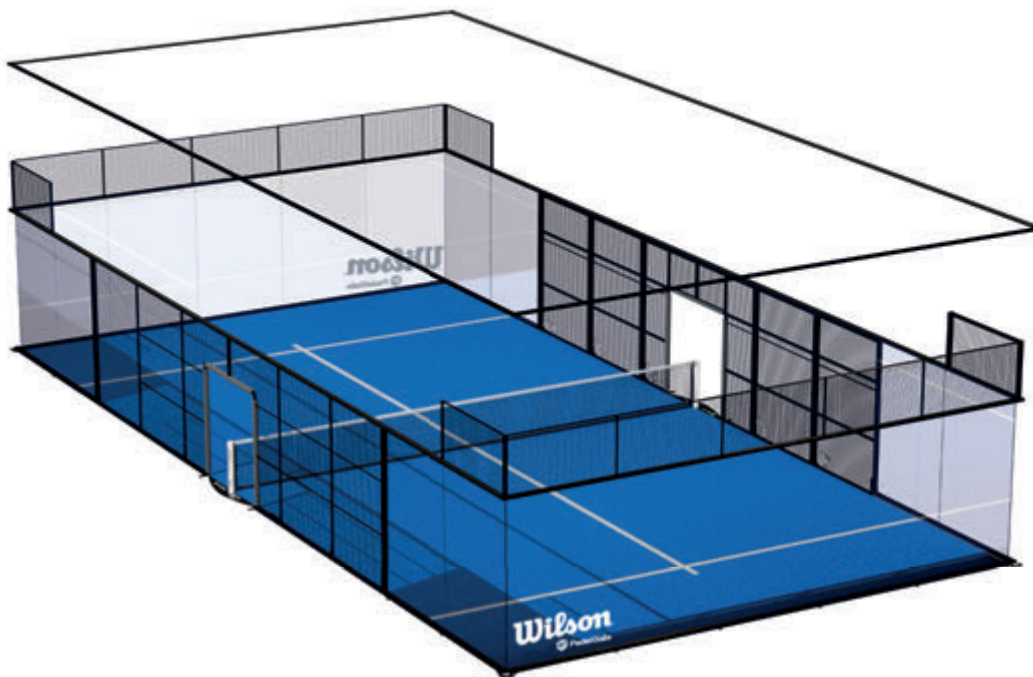

The WILSON 160 is designed under the same concept, to withstand winds of up to 160 km/h without compromising stability or aesthetics. Its corner pillars deliver exceptional strength and improved visibility, while Wilson’s customized details, glossy paint finish, and 4x64 LEDs lighting elevate the playing experience.

Model	WILSON 160
Structure	PANORAMIC
Turf	PGR
Lighting	4x64 LED
Light pole	V SHAPE
Accessories	Wilson
Wind resistance	99MP/H

WILSON ULTRA

This is an ultra-panoramic court designed exclusively for indoor use, incorporating a continuous perimeter lighting system capable of illuminating the court 360 degrees with more than 1,000 lux, eliminating shadows and glare. In addition, it reduces energy consumption by up to 80% and allows light intensity to be adjusted at any time. It includes exclusive details such as integrated ball storage and the absence of mesh covers, achieving a clean and fully distinctive aesthetic.

Model	WILSON ULTRA
Structure	ULTRAPANORAMIC
Turf	PGR
Lighting	PERIMETER
Accessories	Wilson

FlexiPadel

The Galís portable padel platform, developed together with FlexiPadel, allows padel courts to be installed on virtually any surface, without the need for foundations or civil works. Thanks to its self-leveling system, it adapts to uneven surfaces of up to 1 meter, guaranteeing a stable and professional base.

Its modular and lightweight design offers maximum flexibility: it is ideal for both temporary projects (events, rooftops, trade fairs) and permanent installations on uneven ground, parking lots, beaches, or urban environments.

Manufactured with high-strength steel and 100% recyclable materials, it combines durability, sustainability, and extremely fast assembly. The platform is fully dismantlable and reusable, allowing the installation to be relocated or even rented while maintaining its value over time.

Compatible with the MUNDIAL90, M360, WILSON90, and ATLAS models, FlexiPadel expands installation possibilities by offering solutions where other systems cannot reach. In addition, its low weight per square meter makes it the perfect option for roofs, terraces, and load-sensitive structures.

MAIN BENEFITS

- Installation in hours, with no construction or foundations required.
- Adaptation to uneven surfaces and pronounced slopes.
- Ideal for rooftops, beaches, parking lots, events, and special projects.
- Portable, dismantlable, and reusable platform.
- Recyclable materials and low environmental footprint.
- Certified solution developed by padel infrastructure experts.

FlexiPadel makes it possible to install padel where it once seemed impossible. Modular, sustainable, and flexible technology for projects of any scale, anywhere in the world.

FLEXIPADEL PROJECTS

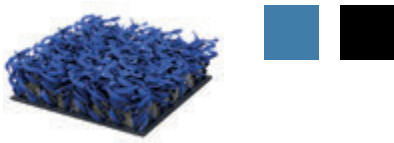

TURF

TEXTURIZED

A type of artificial turf with fibers of different shapes and tones that imitate the irregular appearance of natural grass, providing a more realistic look and a softer feel.

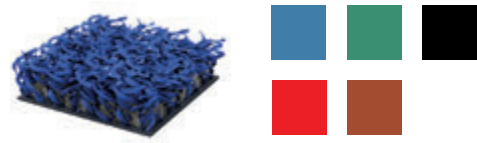

MONDO X3

Combines three texturized monofilaments to deliver maximum grip, impact absorption, and a uniform ball bounce.

MONDO SUPERCOURT

Balances sliding and grip, ensures game speed, and requires minimal maintenance with excellent uniformity.

FGR by BIL

Greater sliding, higher ball bounce, developed together with the No. 1.

PG5

Durable and functional texturized turf, designed to offer good playing performance, durability, and an affordable solution for general-use padel courts.

FGR+ Produced with 100% sustainable materials.

MONOFILAMENT

Is an artificial turf made of straight, strong individual fibers that retain their shape for longer, offering greater durability and a neat, uniform appearance.

TURFGRASS ADVANCED

Durable and functional monofilament turf, designed to deliver good playing performance, durability, and an affordable solution for general-use padel courts.

MONDO STX

High durability with 0.4 inches fibers, designed for stable performance and optimal resistance on padel courts.

R&D

FROM THE LAB TO YOUR COURT

PGR by Bela is more than just padel turf: it is the result of studies carried out by the Valencia Institute of Biomechanics (IBV) with real players—including Bela—to measure impact, bounce, and friction on court.

The result:

- More sliding for a smoother game
- Higher bounce for faster response
- Reduced joint impact to lower the risk of injury

Performance, safety, and sustainability in every point.

				
Greater sliding	Lower joint impact	Higher ball bounce	Approved by the FEP	50% fewer seams

Fewer seams, greater strength

Our exclusive installation system revolutionizes padel court assembly. Thanks to our 16.4 ft-wide rolls and the use of textured turf (with no fiber direction), we achieve a more efficient installation with a flawless finish.

- Over 50% fewer seams
- Less tape and adhesive
- Savings of more than 3 hours of installation per court
- Greater strength and durability

COMPLEMENTS

ANTI-BIRD GLASS

Bird-proof glass is an innovative and ecological solution designed specifically to avoid a risk to birds.

SOLAR VINYL

Solar vinyls are a practical and modern solution to optimize the use of padle courts, especially in outdoor facilities or in environments with high sun exposure.

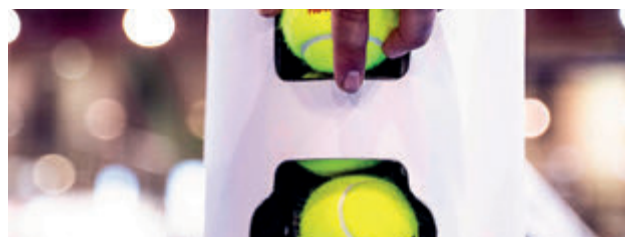

BENCHES

Benches on padel courts are essential elements that provide comfort to players during breaks between sets or matches.

BALL STORAGE + PROTECTIONS

DECORATIVE TURF FOR OUTDOOR COURT

TURF WALKWAY - **PGR** by *Bela*

The PGR by Bela model, now available in a walkway version, offers professional aesthetic continuity from access areas to adjacent court zones. Its strength and visual finish make it an impeccable solution for high-level sports environments.

Main Features

- Dimensions: 6.5 × 19.7 ft
- Customization: Option to include your logo
- Recommended use: Entrances, court perimeters, transit areas, waiting zones, circuits, and decorative walkways

TURF WALKWAY - **realturf. VITA**

The VITA turf stands out for its balance between aesthetics, natural appearance, and functionality, making it ideal for spaces that require a realistic and durable finish. It provides a fresh, natural look, offering comfort, stability, and a highly realistic finish. Perfect for court surroundings, public areas, rest zones, and decorative projects with a professional finish.

Main Features

- Color: Two shades of green, with beige and green curl
- Roll sizes: 6.5 × 82 ft / 13.1 × 82 ft
- Pile height: 1.2 in

TURF WALKWAY - **realturf. TREVI**

The TREVI model offers greater visual volume and a cushioned feel, ideal for projects where aesthetics and presence are a priority. Its greater fiber height provides a premium, soft effect without compromising strength. Recommended for public areas, decorative environments, and spaces where a striking, durable turf is desired.

Main Features

- Color: Two shades of green, with beige and green curl
- Roll sizes: 6.5 × 82 ft / 13.1 × 82 ft
- Pile height: 1.5 in

TURF WALKWAY - **realturf. WAY**

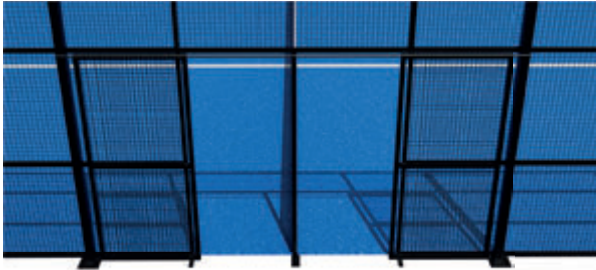

The WAY model combines color, strength, and personality, making it a perfect option for spaces that require high stability and a textured finish. Manufactured with textured fiber and UV treatment, it guarantees optimal performance against the elements. Ideal for terraces, walkways, events, and as walkway turf for padel courts. Its polypropylene and latex backing provides firmness, durability, and a high-quality technical finish.

Main Features

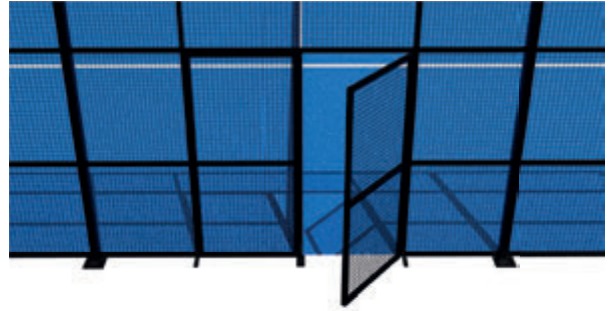

- Color: Gray and black, red and black
- Roll sizes: 6.5 × 98.4 ft
- Pile height: 0.4 in

Team

The world's leading padel court manufacturer — Made in Spain + 161,458 ft² of in-house production facilities in Valencia

Innovation, precision, and confidence in every project.

- Installed capacity: 5,000 courts/year
- + 20 years developing the padel court of the future
- + 161,458 ft² of proprietary industrial facilities
- Automated industrial painting tunnel, including a 21,527 ft² tunnel and over 984 ft of continuous line, capable of painting parts up to 32 ft long with precision and uniformity

International experience, with presence in 75 countries.

SUMMARY COMPARISON OF TURF TYPES

	MONOFILAMENT	TEXTURIZED
DESCRIPTION		
DURABILITY	Individual fibers produced without additional processing.	Monofilament subjected to a texturizing process where it curls.
DURABILITY	High as the fibers have not undergone additional processes.	Less than monofilament due to the wear produced in the fibers by the texturized process.
SPEED OF PLAY	Faster than textured turf surfaces.	Also fast play and more regular bounce, with less sand, suitable for high performance tournaments.
MAINTENANCE	Needs periodic brushing to level silica infills and less infill stability.	Less maintenance as its stability in terms of filling is higher.
AESTHETICS	More natural appearance.	More natural appearance with less visible infill.
RECOMMENDATIONS	Withstands weathering better, making it more suitable for outdoor installations.	Recommended for both indoor and outdoor use. In the latter option, it offers optimal performance and protection against direct sunlight exposure.
ADVANTAGES	Durable, tough and highly resilient.	Superior silica filler stability.
DISADVANTAGES	Requires periodic brushing.	Lower durability.
